

Highlights of the EIE Department

HIGHLIGHTS OF EIE DEPARTMENT

The Department of Electronics and Instrumentation Engineering (EIE) boasts a robust faculty strength of 30 members, each possessing significant academic expertise in cutting-edge AI and Machine Learning technologies. Over 50% of the faculty hold Ph.D. degrees from prestigious institutions such as IITs, NITs, and reputed state universities.

Minor degree programs have been offered in specialized domains such as Data Science, Artificial Intelligence, Machine Learning, and Cyber security. Good number of students opted these programs and have secured 100% placement success, with multiple job offers.

Over the past two decades, the department has consistently achieved an impressive placement record, with approximately 80% of students securing employment year after year.

All laboratories are well-equipped with state-of-the-art technological tools essential for implementing projects in Artificial Intelligence (AI), Machine Learning (ML), the Internet of Things (IoT), Electronics, and Process Automation.

The department has consistently excelled in academics, securing over a dozen gold medals awarded by esteemed external professional organizations to date.

EIE Faculty have published more than 500 research papers in indexed journals and conferences, secured 34 patents, and maintain strong collaborative ties with ZF and DRDO and various other government agencies through the successful execution of multiple externally funded projects.

A significant number of students have either pursued or are currently pursuing higher education at prestigious universities across the globe, including institutions in the United States, Germany, Canada, Australia, the United Kingdom, and other leading academic destinations.

Many faculty members have advanced their expertise to adeptly harness Artificial Intelligence and Machine Learning technologies in the pursuit of cutting-edge research and the seamless execution of collaborative initiatives between academia and industry.

Students are actively encouraged to pursue internships at premier institutions such as the IITs, fostering valuable academic collaborations. Additionally, several students secure paid internships, many of which seamlessly transition into full-time employment opportunities.

Students are actively encouraged to participate in both extracurricular and co-curricular activities, where many have excelled and secured prestigious accolades. Notably, a few of our students are national-level athletes and performers.
