

About Department

About the Department

Department of Mechanical Engineering is one of the oldest departments established at the time of inception of the institute in the year 1995. The department currently offers an undergraduate program - B.Tech. in Mechanical Engineering and two postgraduate programs - M.Tech. in Advanced Manufacturing Systems and M.Tech. in CAD/CAM. Department is recognized as ?Research Center? by the JNTU Hyderabad for offering Ph.D. program. The programs offered are intended to prepare students for successful careers and lifelong learning in Mechanical Engineering.

Currently the department has highly qualified and well-experienced 37 faculty members out of which 28 are Doctorates and 12 non-teaching staff. Department has 14 laboratories for Undergraduate and 02 for Postgraduate and Research programs. The state-of-the-art CAD/CAM and CNC laboratories are equipped with 225 computing systems and workstations and softwares like CATIA, AUTOCAD, SOLID WORKS, ANSYS, MINITAB, CNC OFFLINE SIMULATION SOFTWARE, FLEXSIM, ADAMS, MATLAB, INVENTOR, EDGE CAM, MASTER CAM, ARTEC STUDIO, NETFAB PREMIUM, AUTOMATION STUDIO, ROBOGUIDE, ROBOT ? ARM SIMULATION etc. The department has an exclusive laboratory for emerging technology on 3D Printing ? consisting of 12 FDM and 01 SLA 3D Printers along with 01 Artec 3D Scanner. Also, the department has three Centre of Excellences in Joining Technology, Centre for Solar Energy Materials & Composite Fabrication. The department faculty have published 602 research papers with 7500+ Citations.

The department has a congenial environment for study, supported by stimulating education and research.

Faculty have received grants worth Rs.3.0 crores from various funding agencies for carrying out research

projects. As on date, 10 research projects have been completed and 06 are ongoing.

Department faculty

have 7 granted patents & 14 published patents. Papers authored by the faculty and students are published

in leading national and international journals and presented at several national/international conferences.

Certificate and vocational courses are offered to equip the students with additional skills relevant to the

industry. Regular FDPs, STTPs, workshops and conferences are organized wherein distinguished academicians and industry experts take part for the benefit of both students and faculty.

Mechanical Engineering students are well placed in both core manufacturing as well as IT

Mechanical Engineering

industries.

Some of the core manufacturing industries include JSW, TechnipFMC, Hyundai, MRF, Mahindra & Mahindra, Bluestar, Ashok Leyland, ZF India, Amara Raja etc. Many students of Mechanical Engineering

opt for pursuing higher studies in US, UK, Germany etc. after the graduation.

The faculty and students are members of various national and international academic forums

of science

and engineering like ASME, ISTE, IWS, SAE etc. The students participate in various national and

international competitions under the ASME student chapter of the department and have won distinguished

prizes and awards nationally. ASME student chapter has designed and fabricated innovative projects over

the years and have gained great stature.

Vision

To develop into a Centre of Excellence in Education and

Research in the field of Mechanical Engineering, consistent with the contemporary and future needs of the country

Mission

To impart high quality education in Mechanical Engineering by

using modern pedagogical tools so as to make the students technically competent in their chosen fields and socially responsible.

To inculcate quality research by developing linkages with

Industry and R & D organizations in India & abroad
