

Academic Programs

B.TECH (IT)

Programme Educational Outcomes (PEOs)

PEO-1: Graduates will be acquainted with

knowledge to contribute theoretical, mathematical and scientific foundations which are flag stones on which Information Technologies are built, and engage in perennial learning by anticipating changing trends in Information Technology.

PEO-2: Graduates will meet the meticulous

competitive admission procedure and requirements of national and international markets by exhibiting high qualifications gained through advanced training, independent learners, show team competence to design, analyse and solve real-world IT domain problems.

PEO-3: Graduates will gain research

abilities to pursue their professional careers for self-advancement while meeting the requirements for professional instructors, lecturers, researchers, developers and entrepreneurs so as to cater the needs of both academic and industry..

PEO-4: Graduates will be renowned in their

preferred domains, acquire the potentiality and competency to exhibit intellectual breadth and lifelong intellectual curiosity essential to cater needs of IT industry creatively and responsibly in leading edge global and societal environments.

Programme Outcomes (POs)

The program demonstrates that the graduate is able to:

PO-1: Apply mathematics, logical,

statistical, and scientific principles, emphasizing computing and information processing.

PO-2: Identify and analyse the user needs

and take them in to account for Selection, Creation, Evaluation and Administration of Computer-based systems.

PO-3: Understand software engineering and

Testing principles and apply them to design, develop, implement and deploy with extensive security features.

PO-4: Engage actively in research,

consulting, and other professional activities, both to advance individual professional competence and to integrate new knowledge into the educational programs.

PO-5: Use modern techniques and tools

Information Technology

necessary for computing practice that drives towards entrepreneurship.

PO-6: Update their knowledge with the latest technologies by getting involved in projects benefiting the society and contributing to economic growth.

PO-7: Understand the impact of engineering solutions in a social and global environment and ensure sustainability of the solutions.

PO-8: Apply information technology principles and practices to a variety of problems, with the understanding of social, professional and ethical issues.

PO-9: Work effectively in teams with people of diverse backgrounds at all corporate levels.

PO-10: Demonstrate quality skills so as to speak listen and present effectively the acquired technical knowledge to a range of audience.

PO-11: Utilize project management skills and principles of finance and economics in the construction of hardware and software systems with business objective.

PO-12: Engage in lifelong learning to adopt or develop the technological advancements to meet the growing and changing societal needs.

Programme Specific Outcomes (PSOs)

PSO-1: The ability to identify, analyse and design solutions for complex engineering problems in multidisciplinary areas by understanding the core principles and concepts of Information Technology.

PSO-2: Knowledge of data management system like data acquisition, big data so as to enable students in solving problems using the techniques of data analytics like pattern recognition and knowledge discovery.

PSO-3: Basic knowledge in hardware/software methods and tools for solving real-life and R& D problems with an orientation to lifelong learning

PSO-4: The ability to employ modern computer languages, environments, and platforms in creating innovative career paths to be an entrepreneur, and a zest for higher studies.

M TECH Computer Networks and Information Security

Programme Specific Outcomes (PEOs)

PEO-1: Apply the necessary mathematical tools and fundamental & advanced knowledge of computer science & engineering and computer networks

Information Technology

PEO-2: Develop computer network & security

systems understanding the importance of social, business, technical, environmental, and human context in which the systems would work

PEO-3: Articulate fundamental concepts,

design underpinnings of network & security systems, and research findings to train professionals or to educate post engineering students

PEO-4: Contribute effectively as a team

member/leader, using common tools and environment, in computer networks & security projects, research, or education

PEO-4: Pursue life-long learning and

research in computer networks and contribute to the growth of that field and society at large

Programme Outcomes(POs)

PO-1: Ability to independently carry out

research/investigation and development work to solve practical problems.

PO-2: Ability to write and present a

substantial technical report/document.

PO-3: Able to demonstrate a degree of

mastery over the area as per the specialization of the program.

PO-4: Demonstrate advanced knowledge of

Wired and Wireless Networks, Network Security, Ethical Hacking, Cyber Laws and Network Protocols

PO-5: Analyse and Develop solutions for

complex problems in computer Networks and Information security domain

PO-6: Apply advanced knowledge to identify

research challenges, and contribute individually or in teams to the development of Computer Networks and Information security domain.

PROGRAM SPECIFIC OUTCOMES (PSOs)

PSO-1: Students will acquire in-depth knowledge in field of Computer Networks and Information Security.

PSO-2: Students will be prepared to develop skills in finding solutions to prevent cyber crimes.

PSO-3: : Students will be prepared to analyze the problems of society and involve in the development of secured networks.
